Domini Sustainable Solutions Fund℠

INVESTOR SHARES | CAREX

Shareholder Report Overview

This annual shareholder report contains important information about the Domini Sustainable Solutions Fund for the period of August 1, 2025 to July 31, 2026. You can find additional information about the Fund at *domini.com*. You can also request information by contacting us at 1-800-582-6757 or by emailing funddocuments@domini.com. **This report describes changes to the Fund that occurred during the reporting period.**

What were the Fund costs for last year? (based on a hypothetical $10,000 investment)

Class Name	Cost of a $10,000 investment	Costs paid as a percentage of a $10,000 investment
Investor shares	$152	1.33%

How did the Fund perform last year and what affected its performance?

The Fund's Investor shares returned 28.83% for the trailing twelve months ended July 31, 2026, outperforming relative to the MSCI World Equal Weighted Net Total Return Index (the "benchmark"), which returned 18.66%. This Fund invests in a high-conviction portfolio of fewer than 50 stocks, seeking solution-oriented companies that support certain sustainability themes. The portfolio is constructed through bottom-up stock selection, and it is not managed to or constrained by the benchmark.

Global equities delivered strong returns over the period, supported by resilient corporate earnings, three Federal Reserve rate cuts in the second half of 2025, and continued enthusiasm for artificial intelligence (AI) infrastructure spending. Markets navigated meaningful volatility, including a first-quarter 2026 selloff tied to U.S.–Iran tensions that sent energy prices sharply higher. This was followed by a strong rebound in the second quarter, as initial reports of a potential cease-fire supported a recovery in risk appetite.

Relative to the benchmark, outperformance was primarily driven by stock selection and overweight positioning in Information Technology (IT), which benefited from AI-related infrastructure spending. The top overall contributor was optical networking company Ciena, which more than quadrupled during the period. Other IT names among the top contributors were specialty glass and fiber manufacturer Corning, electronics manufacturing services company Flex, and cybersecurity software company Palo Alto Networks. Selection was also strong in Industrials, where the top contributor was building systems company Comfort Systems USA.

Top detractors included fintech and payments company Fiserv, Latin American e-commerce company MercadoLibre, design software company Autodesk, and healthcare robotics company Intuitive Surgical. Results were also negatively impacted by the Fund's zero exposure to Energy, which was the top performing sector for the benchmark over the period. The Fund does not invest in the GICS Energy sector in accordance with Domini's exclusionary standards on fossil fuels.
