Shareholder Report Overview

This shareholder report contains important information about the Domini Impact International Equity Fund for the period of August 1, 2023 to July 31, 2024. You can find additional information about the Fund at *domini.com*. You can also request information by contacting us at 1-800-582-6757 or by emailing funddocuments@domini.com.

This report describes changes to the Fund that occurred during the reporting period.

What were the Fund costs for last year? (based on a hypothetical \$10,000 investment)

Class Name	Cost of a \$10,000 investment	Costs paid as a percentage of a \$10,000 investment
Institutional shares	\$104	0.96%

How did the Fund perform last year and what affected its performance?

The Fund’s Institutional Shares returned 16.06% for the trailing twelve months ended July 31, 2024, outperforming the MSCI EAFE Net Total Return Index (the “benchmark”), which returned 11.21%.

Equities generally experienced strong positive returns over the period, boosted by falling inflation, resilient economic data, and expectations for lower interest rates. Mega-capitalization and growth stocks outperformed, with swelling enthusiasm around artificial intelligence (AI) driving particularly strong results for large technology stocks.

The Fund’s subadviser, Wellington Management, selects Domini-approved securities and manages investment risk using proprietary quantitative models. Security selections made using Wellington Management’s Quantitative Equity model drove outperformance during the period, with all three of the model’s main factor themes—momentum, quality, and value—contributing positively. This was partially offset by a negative impact from the Fund’s underweight to size (i.e., investing in companies on average with a smaller market capitalization relative to the companies in the benchmark). From a sector perspective, outperformance was driven by positive stock selection in the Financials, Health Care, and Industrials sectors, partially offset by negative security selection in the Information Technology sector.
