Past performance is no guarantee of future results. The Fund's returns quoted above represent past performance after all expenses. Certain fees and expenses also apply to a continued investment in the Fund and are described in the prospectus. See the Fund's prospectus for further information. Total return for the Fund is based on the Fund's net asset values and assumes all dividends and capital gains were reinvested. The total returns do not reflect the deduction of fees and taxes that a shareholder would pay on Fund distributions or the redemption of Fund shares. An investment in the Funds is not a bank deposit, is not insured, and is subject to certain risks, including possible loss of principal. The market value of Fund investments will fluctuate, and you may lose money. The Fund is subject to certain risks including impact investing, portfolio management, information, market, recent events, and mid- to large-cap companies risks. Investing internationally involves special risks, such as currency fluctuations, social and economic instability, differing security regulations and accounting standards, limited public information, possible changes in taxation, and periods of illiquidity. These risks may be heightened in connection with investments in emerging market countries. The Adviser's evaluation of environmental and social factors in its investment selections will affect the Fund's exposure to certain issuers, industries, sectors, regions, and countries and may impact the relative financial performance of the Fund depending on whether such investments are in or out of favor. The value of your investment may decrease if the Adviser's or Subadvisor's judgment about Fund investments does not produce the desired results. There is a risk that information used by the Adviser to evaluate environmental and social factors, may not be readily available or complete, which could negatively impact the Adviser's ability to evaluate such factors and Fund performance.
