Creating change can be a gradual process. We understand this, especially as impact investors—since our work requires persistence and patience. But, in time, diligence is rewarded with bursts of momentum.

Progress on climate, for example, is picking up speed. Climate Week 2022 recently brought together leaders and experts from around the world. The Inflation Reduction Act—passed by U.S. Congress over the summer—represents an unprecedented surge of climate action that will help rally the global community. These events are cause for optimism and are giving us further clarity on how investors, companies, and communities can work together to drive progress.

We have valuable momentum right now. This update spotlights how our investments and engagements are helping seize this momentum—on climate change, biodiversity, labor rights, affordable housing, and more.

In this edition

3 Biodiversity, Forests, and the Path to Net-Zero
4 Addressing Uyghur Human Rights in the Cotton Supply Chain
4 Freedom of Association
5 Access to Equitable and Affordable Housing
6 A Transformational Climate Transition
Engagement Overview

Domini meets with company executives on its own and in collaboration with other investors to encourage stronger policies and practices on the issues that matter to us. Aligned with our standards, we seek improved disclosure, more responsible practices, and address emerging issues with our companies. Through this constructive interaction – via letters, dialogues, shareholder proposals, and proxy votes – Domini communicates its expectations to companies and encourages innovation and business models that uphold respect for human rights while contributing to ecological sustainability and resilience.

Q3 Engagement Reach

The UN Sustainable Development Goals (SDGs)

In the seven years since United Nations member states adopted the 2030 Agenda for Sustainable Development, the Sustainable Development Goals (SDGs) have been widely embraced by governments, civil society organizations, companies, and investors. The SDGs aim to address broad global topics such as poverty eradication, food security, protection of forests, sustainable cities and economic growth, gender equality, and climate change.

In each Impact Update, we’ll feature a few of our engagements alongside an investment highlight and show you which SDGs these are aligned with.

**Goal 1: End poverty in all its forms everywhere**

**Goal 2: End hunger, achieve food security and improved nutrition and promote sustainable agriculture**

**Goal 3: Ensure healthy lives and promote well-being for all at all ages**

**Goal 4: Ensure inclusive and equitable quality education and promote lifelong learning opportunities for all**

**Goal 5: Achieve gender equality and empower all women and girls**

**Goal 6: Ensure availability and sustainable management of water and sanitation for all**

**Goal 7: Ensure access to affordable, reliable, sustainable and modern energy for all**

**Goal 8: Promote sustained, inclusive and sustainable economic growth, full and productive employment and decent work for all**

**Goal 9: Build resilient infrastructure, promote inclusive and sustainable industrialization and foster innovation**

**Goal 10: Reduce inequality within and among countries**

**Goal 11: Make cities and human settlements inclusive, safe, resilient and sustainable**

**Goal 12: Ensure sustainable consumption and production patterns**

**Goal 13: Take urgent action to combat climate change and its impacts**

**Goal 14: Conserve and sustainably use the oceans, seas and marine resources for sustainable development**

**Goal 15: Protect, restore and promote sustainable use of terrestrial ecosystems, sustainably manage forests, combat desertification, and halt and reverse land degradation and halt biodiversity loss**

**Goal 16: Promote peaceful and inclusive societies for sustainable development, provide access to justice for all and build effective, accountable and inclusive institutions at all levels**

**Goal 17: Strengthen the means of implementation and revitalize the global partnership for sustainable development**

https://sdgs.un.org/goals
Different strategies are needed to address climate change—from reducing the emissions caused by energy use to making sure we protect resources, like forests, that will help us offset emissions. As global leaders gathered in New York for the UN General Assembly during Climate Week, we were pleased to participate. Our CEO, Carole Laible, spoke at a UN General Assembly side-event on biodiversity alongside heads of state, Indigenous leaders, and experts in advance of UN Biodiversity COP 15, which takes place in Montreal this December. Representing the Finance for Biodiversity Pledge, Laible encouraged the adoption of a strong global biodiversity framework and emphasized the important role of the financial sector. It is essential that we end the financing of activities that harm biodiversity, and increase financing for nature-positive activity with support from public and private sector actors.

Our Director of Engagement, Mary Beth Gallagher, spoke about our work on deforestation before different audiences—strengthening partnerships and collaborations with civil society partners, Indigenous leaders, and investors, among other stakeholders. We shared about our efforts already underway to implement the commitment to address deforestation in our portfolios by 2025. We are focused on assessing how companies in our funds may be at risk, and are encouraging companies to commit to and work toward ending tropical deforestation related to paper, soy, palm oil, and cattle. We also urge the adoption of best practices and emerging nature-based solutions that can reduce our dependence on agriculture responsible for deforestation and land conversion. We recognize this as an important part of the pathway to net-zero emissions.

**Investment Highlight: Domini Impact International Equity Fund**

DBS is a Singapore-based bank. In 2021, DBS strengthened its climate action by committing to end its financing of the coal industry completely by 2039. In the short-term, the company has pledged to immediately stop working with new customers that generate more than 25% of revenues from coal—and will gradually lower this threshold. Starting in 2026, DBS will stop lending to customers with coal-fired revenue over 50%, and instead will focus on financing non-coal-fired or renewable energy projects.

**Investment Highlight: Domini Sustainable Solutions Fund**

ST Micro is a French semiconductor company. It offers various products that improve energy efficiency, including products for factory automation, public transportation, smart grid, and renewable energy sectors. As of December 2021, it was the only semiconductor company whose business model was aligned with 1.5 degree climate transition targets, earning approval from the Science Based Targets Initiative (SBTi). ST Micro is on the pathway to achieve net-zero emissions by 2027.
Unions play an important role in helping workers collectively advocate for their fundamental rights and secure better working conditions, wages, benefits, and training. They also offer benefits to companies, supporting better communication channels with workers and lowering turnover. At Domini, we favor unions. They are gaining increasing support among workers and others, with recent polling showing that 71% of Americans approve of labor unions.¹

We co-filed a proposal asking that Tesla adopt a policy on freedom of association and collective bargaining. The proposal received support from 32% of investors. While Tesla is a leader on climate change, it faces criticism around workforce practices, including anti-union tactics, racial discrimination lawsuits, and poor working conditions in China. Implementing clear policies would help Tesla treat employees fairly and create a positive productive work environment.

In the apparel and retail industries, the cotton supply chain has been a source of increasing human rights risks and has drawn enhanced regulatory scrutiny. The U.S. Uyghur Forced Labor Prevention Act went into effect in June, and companies are now under further pressure to demonstrate that their human rights policies and programs are working.

We engaged with Hennes & Mauritz (H&M) and adidas to better understand how they implement their human rights commitments in this complex supply chain and geopolitical context. Given how severe and widespread the alleged abuses are in the Chinese cotton sector, we filed a proposal with Nike urging the company to stop sourcing and manufacturing cotton from China until the human rights situation improves. The proposal sparked important conversations among investors and within the company.

The UN High Commissioner for Human Rights issued a report on the situation in the Uyghur region in China, confirming the serious human rights violations—including detention, torture, religious persecution, and family separation—that are impacting over one million Uyghur ethnic minorities.

Addressing Uyghur Human Rights in the Cotton Supply Chain

Freedom of Association

Working with Bloomberg to Improve DEI Data

Investment Highlight: Domini Impact Equity Fund

United Parcel Service (UPS) is the largest shipping company in the world. Over 60% of its employees are hired under collective bargaining agreements. Growing consumer demand has pushed logistics companies to compete aggressively over workers. UPS’s unionized workforce has a lower turnover than the non-unionized workforces of its peers, giving it a competitive advantage.

Domini conducts all its research in house without purchasing any third-party ESG research. One of the tools used by our team is the Bloomberg Terminal, which aggregates data from companies and makes it easily accessible. Unfortunately, data on diversity, equity, and inclusion is not as readily available or standardized as other data points. Domini is in a dialogue with Bloomberg, discussing what DEI data would enhance our research process.
Bond Fund:
Access to Equitable and Affordable Housing

We met with Fannie Mae Single-Family Business to provide input on its new proposed Social Index Methodology, which seeks to provide increased disclosure to investors about the mortgages underlying an asset-backed security, while protecting the privacy of individual borrowers. This framework will give more data to investors who are seeking to invest in affordable housing, communities that have historically been excluded, or further other social goals. For example, the index includes information about the income of the borrower, or if they are a minority or first-time homebuyer. It also indicates generally where a property is located, so an investor knows whether they are investing in housing in a low-income, rural, minority neighborhood, or a mobile home, which is generally more affordable.

Our engagement supported the goals of the index. We worked to better understand how Fannie Mae may use the information, and if it has the potential to have a positive impact for borrowers. We offered some recommendations and encouraged the development of strategies to address structural issues, such as historical home ownership disparities by race or the risks of displacement and gentrification.

Domini Impact Bond Fund Theme Allocations²

Access to Housing
Supports affordable mortgage credit & rental properties, multifamily collateralized mortgage obligations, and other residential mortgage backed securities.

Economic & Community Development
Supports nonprofit education, rural & agricultural communities, creative economy & public interest, transportation, access to water, business & job creation, and community development financial institutions.

Corporate Debt³
Supports corporate general obligations & bank loans of companies that meet Domini's Impact Investment Standards.

Non-Housing Asset-Backed Securities
Supports commercial mortgage-backed securities, auto loans, and other asset-backed securities that meet Domini's Impact Investment Standards.

Health, Well-Being & Aging Society
Supports nonprofit healthcare and research facilities, housing and healthcare services, and pensions.

Low-Carbon Transition
Supports renewable energy, energy efficiency and green buildings, sustainable cities, sustainable forestry and conservation, and corporate green and sustainability bonds.

Investment Highlight: Domini Impact Bond Fund

Federal Farm Credit Banks Funding Corporation provides a source of capital to rural communities and businesses, as well as to the infrastructure providers that supply clean water, reliable energy, and internet access. It is currently a lender to more than 600,000 customers, supporting over 40% of all U.S. farm business debt.
On August 16, President Biden signed the Inflation Reduction Act into law. The surprise deal, which came after a year debate, represents a level of climate action that has eluded U.S. policy makers for decades and sends a signal to the global community that the U.S. is on board. The law is complex and our work is just beginning—but it is bold action and an unmistakable step in the right direction.

Capitol Hill, of course, isn’t the only place where climate action takes place. It can’t be. Years of Congressional gridlock has meant that communities, companies, and their investors have become key drivers of climate action. The Inflation Reduction Act has created a new sense of momentum and optimism for everyone working on the climate crisis. As we embark on this crucial opportunity to restructure our economy, we cannot afford to replicate the problems of the past. We need an ambitious, substantive climate response that puts equity at its very center. There’s no time for delay. Companies are already sharing announcements of initiatives, partnerships, and facilities that are enhanced by the new legislation. They are building solutions that our investments can help bring to scale.

At Domini, climate change has long been central to our investment approach. We can help create a better future through our choices, and so can each individual.

**What We Look At**

Our core goals are universal human dignity and ecological sustainability. They’ve shaped how we analyze, invest in, and seek to influence companies since day one. There are certain lines of business that we believe are fundamentally misaligned with our goals. Our response? We don’t invest in them, plain and simple.

Excluding fossil fuels is an essential first step in building portfolios geared for a more sustainable economy. But most research questions aren’t so cut-and-dry. Whether a company is contributing towards a greener future often depends on their business model, their climate transition plans, and their efforts to center the needs of their communities, customers, and other stakeholders.

*For more on our excluded industries, visit domini.com/exclusions*

Effectively analyzing those points means getting down to the details—so we’ve evolved our Impact Investment Standards accordingly. We go beyond the assessment of greenhouse gas emissions reductions. We look for evidence that companies are aiming to lower their climate impact by focusing capital expenditure on energy efficiency, renewable energy, recycling and circular economy initiatives, and a just transition. These plans should incorporate thorough assessments of risks and opportunities across their markets and industries, and recognize the intersection between environmental issues and social justice in the low-carbon transition.

**Thinking Big, Working Collaboratively**

As impact investors, our main focus is identifying companies that are helping create a more sustainable future. But our scope isn’t limited just to corporate climate action. We know that companies’ climate work intersects with local environmental justice challenges, federal climate policy, and much more.

*Learn more about what assessment tools we use, how we engage companies, and our climate action partnerships at domini.com/climatetransition*
The care is mutual. The funds are too.

Seeking to harness the power of finance to create a better world involves many things. Below, we discuss four of them. Namely, offering support and mentorship, celebrating the work of our partners, highlighting sustainable companies, and connecting with investors nationwide.

Carole Laible: The Rewards of Mentorship Recently, our CEO, Carole Laible, wrote about the wonderful mentors that have supported her throughout her career—and how important it is to give back by building relationships with those who are looking for guidance. Read more at domini.com/mentor

An Evening with ICCR We thoroughly enjoyed joining one of our longtime partners, the Interfaith Center on Corporate Responsibility, ICCR, for its recent Good Company special event. The gathering was an opportunity to celebrate achievements in corporate responsibility and further the conversation on the role of companies in a just society.

ESG Highlights—All in One Place We invest in companies that are striving to help create a better future. Our ESG Highlights, which you can read on our website, offer a quick look at some of the sustainable innovations being made by companies working on clean energy, inclusive finance, and much more. Read more at domini.com/highlights

Domini on the road Domini is excited to be back on the in-person conference circuit. Next, we’ll be in:

- San Francisco, for SOCAP22 on October 17-20
- Nashville, for the 2022 Money Management Institute Annual Conference on October 19-21
- New York City, for Reuter’s ESG Investment North America 2022 on November 1-2
- New York City, for the Women Adviser Summit 2022 on November 16

Effectively analyzing those points means getting down to the details—so we’ve evolved our Impact Investment Standards accordingly. We go beyond the assessment of greenhouse gas emissions reductions. We look for evidence that companies are aiming to lower their climate impact by focusing capital expenditure on energy efficiency, renewable energy, recycling and circular economy initiatives, and a just transition. These plans should incorporate thorough assessments of risks and opportunities across their markets and industries, and recognize the intersection between environmental issues and social justice in the low-carbon transition.
Before investing, consider each Fund's investment objectives, risks, charges and expenses. Contact us at 1.800.582.6757 for a prospectus containing this and other important information. Read it carefully.

An investment in the Domini Funds is not a bank deposit and is not insured. Investing involves risk, including possible loss of principal. The market value of Fund investments will fluctuate. The Domini Impact Equity Fund is subject to certain risks including impact investing, portfolio management, information, market, recent events, and mid-to large cap companies’ risks. The Domini International Opportunities Fund is subject to certain risks including foreign investing, geographic focus, country, currency, impact investing, and portfolio management risks. The Domini Sustainable Solutions Fund is subject to certain risks including sustainable investing, portfolio management, information, market, recent events, mid- to large-cap companies and small-cap companies’ risks. The Domini Impact International Equity Fund is subject to certain risks including foreign investing, emerging markets, geographic focus, country, currency, impact investing, and portfolio management risks. Investing internationally involves special risks, such as currency fluctuations, social and economic instability, differing securities regulations and accounting standards, limited public information, possible changes in taxation, and periods of illiquidity. These risks may be heightened in connection with investments in emerging market countries. The Domini Impact Bond Fund is subject to certain risks including impact investing, portfolio management, style, information, market, recent events, interest rate and credit risks.

The Adviser’s evaluation of environmental and social factors in its investment selections and the timing of the Subadviser’s implementation of the Adviser’s investment selections will affect the Fund’s exposure to certain issuers, industries, sectors, regions, and countries and may impact the relative financial performance of the Fund depending on whether such investments are in or out of favor. The value of your investment may decrease if the Adviser’s or Subadviser’s judgement about Fund investments does not produce the desired results. There is a risk that information used by the Adviser to evaluate environmental and social factors, may not be readily available or complete, which could negatively impact the Adviser’s ability to evaluate such factors and Fund performance. As of 9/30/22, these securities represented the following percentages of the Domini Impact Equity Fund’s portfolio: STMicroelectronics NV [0.34%], United Parcel Service Inc [0.52%], Tesla Inc [3.05%], Nike Inc [0.46%]. These securities represented the following percentages of the Domini International Opportunities Fund’s portfolio: DBS Group Holdings Ltd [0.70%], STMicroelectronics NV [0.48%], Tesla Inc [0.16%], Hennes & Mauritz AB [0.11%], adidas AG [0.31%]. These securities represented the following percentages of the Domini Sustainable Solutions Fund’s portfolio: STMicroelectronics NV [2.78%], Tesla Inc [5.62%]. These securities represented the following percentages of the Domini Impact International Equity Fund portfolio: DBS Group Holdings Ltd [2.25%], STMicroelectronics NV [0.61%], Hennes & Mauritz AB [0.56%], adidas AG >0.01%. These securities represented the following percentages of the Domini Impact Bond Fund’s portfolio: Fannie Mae [4.81%], Federal Farm Credit Banks Funding Corp. [2.00%].
